CHOOSE ESKIMO®**
THAN ANY OTHER BRAND

*PRO STAFF & MEMBERS OF
PRODUCT DEVELOPMENT TEAM*

OUR PROMISE

Right in the middle of the ice belt you'll find our hometown of Cumberland, Wisconsin – an island city literally surrounded by lakes. Like a lot of our neighbors, we have a love for the outdoors, especially ice fishing. From our customer service representatives, to our welders, to our engineers, fishing is in our DNA. It's not only a business for us, it's a way of life.

It's why we invented QuickFish™, the world's first pop-up portable ice shelter in 2005, giving ice anglers tons of room while remaining lightweight and easy to set up. Then we improved on that design by creating the FatFish™ – the first wide-bottom portable, designed to maximize fishable area. In 2014, we launched the HC40 High-Compression Propane Auger, with a custom-designed engine built to maximize the full potential of propane.

This season, we've created an entirely new category of ice fishing shelters. We're thrilled to introduce the EVO™ Crossover Shelter. Combining the spacious, lightweight comfort of pop-ups with the convenience of flip shelters, the EVO has the best features of both styles. Innovations on the ice—it's why more ice fishermen choose Eskimo than any other brand.

None of this would be possible without your trust and support. You have helped us become the number one supplier of ice fishing gear. For this, we thank you. We look forward to continuing to bring you the best ice fishing products on the market, and we can't wait to see you out on the ice this winter!

ESKIMO® ICE SHELTERS

WHY ESKIMO?

THINGS TO CONSIDER
WHEN CHOOSING A SHELTER

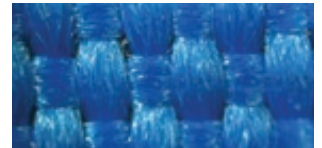

THREAD WEIGHT / THREAD COUNT

ESKIMO VS. THE COMPETITION

When it comes to fabric there are two main factors to consider: thread weight (denier) and thread count. Together these two specifications determine your fabric performance. Competitors claim superiority based on thread weight, using a fabric made with heavier thread than ours (600 denier vs 300 denier). What they don't tell you is that we use a 59% higher thread count, which results in a much tighter weave. The durability and longevity of each fabric is comparable, however, Eskimo's IceTight fabric has an overall weight advantage of 19%! Who wants a heavier house to carry out onto the ice? Furthermore, IceTight fabric is coated, so it is completely wind and waterproof!

INSULATION

ESKIMO IQ INSULATED QUILTED FABRIC

Insulated fabric provides warmth inside your shelter when you need it most. Eskimo insulated IQ™ fabric is made up of two layers of IceTight fabric that sandwich a layer of insulation, providing superior protection from the coldest conditions. Every Eskimo insulated shelter will keep you warm and dry, so you can fish even on the harshest of days. Look for the "i" at the end of applicable model numbers which indicate the insulated option.

Eskimo's IQ fabric helps keep our team toasty warm, even in subzero temperatures."

JOSH CLAWSON
FISHADDICTIONS.COM

ESKIMO YKK ZIPPER

COMPETITOR ZIPPER

ALL ESKIMO SHELTERS FEATURE YKK® ZIPPERS

THE MOST RELIABLE ZIPPERS IN THE INDUSTRY

Eskimo doesn't cut corners when it comes to quality, and that philosophy extends to our choice of zipper. Zippers can be one of the most problematic features on an ice shelter. They work fine in the store, but once you get them into the harsh conditions out on the ice, they can freeze up, or even break. That's why we use only YKK branded zippers on all of our shelters. They are industry leading, rugged and reliable—things you have come to expect in an Eskimo ice shelter.

ICE ANCHORS

EASY TO USE, STRONG-HOLDING

Eskimo ice anchors are widely known and revered for their ease of use and tight-holding grip. These durable, steel-constructed anchors are self-tapping, featuring a sharp point, so they easily screw into the ice by hand. Large mitten grip handles allow you to secure your shelter without needless exposure to the elements.

CROSSOVER SHELTERS

EVO™

**ALL THE BENEFITS OF A FLIP
WITH TWICE THE ROOM**

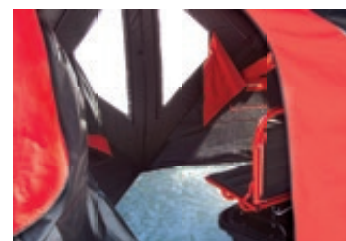

The EVO is the most exciting new ice fishing product in years."

TROY PETERSON (MR. BLUEGILL)
FISHING GUIDE

CROSSOVER SHELTERS

The Eskimo® **EVO** is the first in a brand new category of shelters this year called crossovers. Crossover shelters offer the convenience of a flip-style shelter, with the room and comfort of a pop-up. Compared to similar sized flip-style shelters, the EVO offers more fishable area and functional space, providing plenty of maneuverability and room for your gear. The aerodynamic shape of the EVO cuts through the wind, allowing cold air to pass around the shelter and helping the venting system heat the shelter efficiently. The Eskimo EVO is truly a breakthrough for ice fishing.

FEATURES:

- **MORE FISHABLE AREA** – The EVO gives you more fishable area than any comparable sled style shelter by utilizing fiberglass poles and hub technology.
- **LIGHTWEIGHT** – By replacing bulky metal poles with fiberglass poles, the EVO keeps weight to a minimum and makes it always easy to transport.
- **EXTRA LARGE WINDOWS** – The extra-large windows and coverings on the EVO allow you to control the amount of light being let into the shelter and give you visibility to all parts of the ice without having to leave your seat.
- **EXTRA HEIGHT OVER YOUR HOLES** – With the extra headroom where you need it, setting a hook inside your shack has never been easier.
- **OVERSIZED SIDE DOOR** – The EVO features an oversized side door, making it easy to move yourself and all your gear in and out of the shelter. The side position of the door allows you to enter and exit without having to step over your holes.
- **SELF-TAPPING ICE ANCHORS** – Easier to grip, and won't bend under pressure.
- **BETTER MATERIALS** – 300 Denier IceTight™ fabric with a 59% higher thread count than comparable shelters. This higher thread count results in a tighter weave, and offers the wind and watertight performance that Eskimo is known for, at an average weight savings of up to 19% over most competitors. Heavy-duty material is sewn over corner joints for reinforcement, and YKK® zippers are standard on every Eskimo shelter.
- **AERODYNAMIC** – The unique shape of the EVO allows the venting system to trap heat low in the shelter and force wind to flow smoothly around the outside—eliminating noisy flapping of the skin during windy days.

Eskimo has solved the issue of cramped space with flip shelters. It's the biggest flip shack I've ever seen, and I can't wait to use the extra space to help with landing some big fish."

FATFISH

POP-UP SHELTERS

MORE FISHABLE AREA
THAN COMPARABLE STANDARD
POP-UP SHELTERS

Fish more comfortably with more people and more gear in the **FATFISH™**—the world’s first wide-bottom pop-up portable ice fishing shelter. The FatFish is designed to give you up to 80% more fishable area, while offering the same easy set-up and portability as the best-selling line of QuickFish™ shelters. The entire line of FatFish ice shelters are equipped with an all-metal ball and socket design and larger diameter poles, resulting in a stronger and more durable shelter.

“ I had 5 grown men, all our gear, a 3x3 table, and 2 jig holes with minimal issue. Best investment yet.”

QUICKFISH POP-UP SHELTERS

THE ORIGINAL

As the innovator of the first pop-up portable ice fishing shelter, Eskimo® knows a thing or two about building the world's best on-the-go portables. Don't be fooled by imitation shelters with flimsy hubs, weak poles and cheap fabric. The **QUICKFISH™** is the original and still the best. Constructed with sturdy hubs, strong poles, ample storage pockets, reinforced bottoms, YKK® zippers, IceTight™ fabric, self-tapping ice anchors and removable windows. The QuickFish is built to last season after season.

INFERNO

FLIP SHELTERS

WIDE1™ INFERNO

The fully-insulated Eskimo **WIDE1™ INFERNO** is an expandable wide-bottom one-man flip-style shelter. Its patented design gives anglers more fishable space, while maintaining the lightweight portability of a one-man shelter thanks to a telescoping front end. Once the front end is expanded, users can fish multiple lines and still have room for electronics and a heater. A larger sled on the Wide1 Inferno creates more fishable area with 14.8 square feet and 60 inches of height for setting hooks.

FEATURES:

- Expandable front spreader bar – allowing for 32% more fishable area than any other shelter in its class
- Double-walled hinge provides a sturdier structure in windy conditions
- Mesh storage pockets help to keep your essential fishing gear handy
- Easy to flip up and use as a windbreak on sunny days

SPECIFICATIONS

15350

Capacity	1 Person
Set-Up Size	97" x 52"

FLIPMO² **INFERNO**

The **FLIPMO 2™ INFERNO** shelter is designed for guides and anglers who demand the best ice fishing shelter available. All these features are mounted on an oversized tub, giving anglers plenty of room for storage with leading class durability. This shelter offers all of the features that the most demanding guides and anglers want at a price that won't break the budget.

FEATURES:

- Three large built-in tables to set your gear on
- Large, under seat gear nets to keep your gear off the ice and out of bottom of the sled
- Built-in spreader poles allow for quick and easy storage
- Mesh storage pockets help to keep your essential fishing gear handy
- Easy to flip up and use as a windbreak on sunny days

VIPER®
ENGINES

ALL-METAL TRANSMISSION

All Eskimo power augers feature a precision transmission made of all-metal, without any plastic pieces. This gives you more durability, power, and control from your powerhead.

MITTEN GRIP RECOIL

LARGE HANDLE STARTUP

Oversized mitten grip handles make starting your Eskimo auger a breeze. The large plastic handle accommodates your hand without requiring you to take off your gloves or mitts, meaning you can stay warm and bundled up while drilling.

QUANTUM CUTTING SYSTEM

PERFECT FOR RE-DRILLING OLD HOLES

All Eskimo power augers feature the Quantum™ Cutting System. The Quantum system is specially designed with a unique centering ring that allows you to re-drill old holes by metering the cutting depth with each revolution. Quantum blades last longer than competitor blades and hold their edge well in dirty ice. The combined centering ring and Quantum blades make this cutting system a versatile way to tackle whatever ice you face—whether it's a mess of slush or a clean sheet. Whether your auger is gas or propane, the Quantum Cutting System will deliver.

TRUSTED DURABILITY

INDUSTRY-LEADING 2-YEAR WARRANTY

Eskimo crafts all of their ice fishing gear with durability in mind, and augers are no different. Eskimo augers are built to last from season to season, with helpful customer service available year-round for any issues that do arise. Eskimo stands behind their line of power augers with an industry-leading 2-year warranty.

“Propane is the way to go. No gas fumes or having to deal with a gas can.”

“ No fuel mixing or spilling. No priming or choking. No hassle. I love the HC40 and know anyone who gets their hands on one will too.”

MIKE OLSON
FISHADDICTIONS.COM

**HIGH COMPRESSION
HARDER EXPLOSIONS = MORE POWER**

The Eskimo® **HC40** weighs as little as 30lbs. and has an engine specifically designed to take full advantage of the higher octane rating of propane fuel. Many ice anglers are switching to 4-cycle propane powered augers because they are clean burning and low-maintenance.

The HC40 gives ice anglers the reliability and dependability they have come to expect from Eskimo in an extremely powerful, lightweight package.

FEATURES:

- **HIGH COMPRESSION ENGINE** – A clean burning, 40cc 4-cycle engine with minimal emissions, specifically designed for high-octane propane fuel. The engine is paired with a precision transmission which offers optimum gearing. Both of these mean more power output for your auger.
- **EASY TO USE, EASY TO STORE** – The HC40 is a low maintenance unit. It's light, portable, and easy to transport in your sled or vehicle.
- **FUEL SYSTEM** – An auto prime fuel system and high-profile on/off switch make startup quick, easy, and reliable. Runs on readily available 1lb. propane cylinder, and easily connects with a Quick-Release bottle holder.
- **QUANTUM CUTTING SYSTEM** – The Quantum Auger and Quantum Blades last longer and hold their edge in dirty ice.

SHARK™ Z71

THE MOST POWERFUL ICE AUGER IN THE WORLD

The **SHARK Z71** is the most powerful ice auger in the world. It features a 71cc Viper two-cycle engine specially designed for ice augers. With high torque and RPM, you'll have a Viper engine that overpowers the competition but remains easy to start and operate.

FEATURES:

- **INDUSTRY-FIRST HYPERCOIL™**
Recoil technology that reduces required pulling force by up to 62%, resulting in easier starts and reduced stress on your arms and shoulders.
- **INDUSTRY-FIRST ALUMINUM HANDLE BARS**
Eskimo aluminum handle bars are designed with 45 degree rubber-coated grips that allow ideal wrist motion when drilling a hole. The throttle control is canted in 45 degrees, giving you comfortable control and the ability to easily pull the auger out of the ice without accidentally revving the engine.

Awesome auger. Started on the first pull right out of the box. Cuts nice holes fast and is very easy to run."

HAND AUGERS

Silvertip[™] HAND AUGER

The Eskimo **SILVERTIP[™]** hand auger takes the work out of ice fishing. The CNC ground curved blades put the cutting edge of the Silvertip in precisely the right position for easy and effective cutting. As a result, Silvertip augers tunnel through the ice, requiring minimal down force. Just turn the handle, and let this beautifully designed auger do the rest.

ESKIMO[®] HAND AUGER

Eskimo hand augers are a perfect travel companion for early-or-late-season ice anglers. They are lightweight and effortlessly cut through the ice. Eskimo hand ice auger blades are flat and are designed for long life.

SPECIFICATIONS

16000 / 16500

Auger Length	49" - 58" (Adjustable)
Cutting Diameter	6" / 8"
Blade Style	Curved Blades
Handle Design	2-Piece Pommel
Weight	7 lbs. / 8 lbs.
Warranty	1-Year Limited

The Silvertip blades are formed from a high carbon martensitic stainless steel used most often for knife blades. The hardness and wear resistance of the Silvertip blades are further enhanced by post forming heat treatment. All the work that we put into designing the new Silvertip auger results in less effort when you're out on the ice.

SPECIFICATIONS

HD06 / HD07 / HD08

Auger Length	49" - 58" (Adjustable)
Cutting Diameter	6" / 7" / 8"
Blade Style	Dual-Flat Blades
Handle Design	2-Piece Pommel
Weight	6.5 lbs. / 7 lbs. / 7.5 lbs.
Warranty	1-Year Limited

ICE CHISELS

REDNECK CHISELS™

TRIPLE-ACTION HEAD

A multi-faceted, triple-action chipper head increases surface area and focuses power to sharp points, allowing you to chip more with fewer strokes.

CH7

CH9

CH10

CH11

CH12

FOAM COMFORT GRIP

Foam-grip, anti-vibration handle adds comfort while the tether rope keeps the chisel secure around your wrist.

Long-lasting. Durable. Comfortable. When it comes to **REDNECK CHISELS**, those words say it best. Our heavy-duty line of chisels have everything you need to effectively chip through the ice. The Redneck Chisels are a rock-solid tool perfect for cutting out or re-opening a hole early or late in the season. They're a must-have addition to your ice fishing gear.

SPECIFICATIONS

INCLUDES EVERYTHING SHOWN ABOVE: Tub / Frame / Adjustable Tow Bar / Runner Kit

The **LAKE RUNNER** from Eskimo is the first towable-utility hauler designed for rough-winter terrain. Today's plastic sleds can easily crack when encountering ice chunks or often face plowing issues due to design flaws. The Lake Runner gives you ground clearance unlike any other, 6" of lift gets your gear off the ground and provides stability in transport.

The unique design of the Lake Runner gives you the option to lower the sled to the ground for easy loading/unloading. The innovative lever design lifts the sled and contents inside (300lb weight rating) from the ground. A traveling weight of 900lbs is allowed when lever is not being used to lift the load. Lake Runner takes the hassles out of winter towing.

SPECIFICATIONS

15575

Lift Capacity	300 lbs.
Travel Capacity	900 lbs.
Tub Dimensions	35.5" x 71.75"
Height	20.5" (up) 14.5" (down)
Weight	144 lbs.
Framework	Steel Tubing
