20 Alaskan

SV-18 ALASKAN.
Rugged and wide open SV-18 Alaskan is simply the biggest, toughest, hardest-working boat in its class. There's more than enough space for cargo, gear and passengers. Optional side steering and much more.

LUND ROOTS RUN STRONG AND DEEP.

The Lund tradition of excellence began right here. Rugged, no-nonsense fishing boats built to take years of punishment. Perma-ply bench seats never get too hot or cold. Solid corner and bow castings. Seats riveted down the side and across the bottom. Double-riveted seams. You'll still be pulling fish into your SV long after other boats are sold for scrap.

RIVETED FOR YOUR PROTECTION.

Take a close look at a 747 the next time you're at the airport. Every seam is riveted, just like a Lund boat. Even though our aluminum craftsmen can lay down the smoothest welds in the industry, we double-rivet every seam for unparalleled strength. After all, there's a lot riding on every boat we put on the water — your safety.
