

# What is PROPHECY INFINITY?

PROPHECY Preoperative Navigation Guides are patient-specific surgical instrumentation designed to assist in the positioning of total ankle replacement components.

Through the combination of computer imaging and the patient's own CT scan, a patient-specific preoperative plan is developed. Implant sizing and alignment are determined using the patient's anatomic landmarks and the surgeon's preferences.

PROPHECY Preoperative Navigation Guides are then created which set resection guide locations, reducing intraoperative steps to simplify surgery.

## What are the benefits of preoperative navigation?

PROPHECY guides provide the alignment accuracy of the traditional Total Ankle System while reducing surgical and fluoroscopic steps allowing the potential for:

- Less procedural complexity
- Less fluoroscopy exposure for patients, surgeons, and staff
- Reduced surgical time
